

Independent Expertise for Dynamic Times

EPG Consulting at LogiMAT 2025

Cost-efficient and tailored solutions for automation, transport, and warehouse planning: At Hall 1, Booth 1F58, the supply chain experts from EPG Consulting will offer exclusive insights into holistic and future-ready logistics and supply chain management solutions during LogiMAT 2025. In addition to a comprehensive range of consulting services focused on logistics, EPG Consulting places a special emphasis on core areas such as cost-optimized warehouse and transport planning, as well as the modernization and retrofitting of automated systems. Under the motto “Independent. Holistic. Practical.”, EPG Consulting delivers results-driven strategies and effective solutions tailored to the specific needs of businesses in today’s market environment.

The logistics industry faces numerous challenges: rising costs, increasing demands for sustainability, and the need to future-proof existing processes. This is where EPG Consulting comes in with its independent consulting approach. At LogiMAT 2025, the expert team will showcase how tailored solutions across the entire supply chain can drive greater efficiency, flexibility, and significant cost savings.

As Good as New – Retrofitting Automated Systems

The demand for greater efficiency, concerns about spare part availability, and the need to ensure operational safety and ergonomics are driving companies to continuously improve their existing systems in the fast-paced world of automation technology. To stay competitive, retrofitting and targeted modernization measures provide a cost-effective solution to keep systems up to date or enhance specific functionalities. At LogiMAT 2025, EPG Consulting will demonstrate how a holistic modernization and retrofit strategy can not only boost the efficiency, productivity, and reliability of existing systems but also significantly reduce costs.

Smart and Cost-Optimized Transport Consulting

In an increasingly competitive business landscape, companies face numerous challenges in efficiently managing the movement of goods and materials. Reducing transport costs and cutting greenhouse gas emissions are key priorities for freight and logistics companies, especially in light of rising energy prices. To address these issues, EPG Consulting’s transport management consulting combines decades of expertise with intelligent software solutions.

From the use of the Greenplan Engine optimization algorithm (winner of "Best Product LogiMAT 2023"), which sustainably enhances existing TMS solutions by factoring in time-dependent traffic conditions, to tailored requirement definitions, tendering and awarding processes, and the holistic integration of a new TMS, EPG Consulting offers comprehensive services for the independent optimization of transport management and fleet operations.

Precise Planning and Unlocking Potential – EPG Consulting's Warehouse Planning

Focusing on forward-looking, precise planning, EPG Consulting provides comprehensive support for the design, expansion, and optimization of warehouse structures and locations. The goal: uncover potential, develop tailored solutions, and reduce logistics costs. EPG Consulting's warehouse logistics experts guide companies through every phase of warehouse planning—from concept development and planning to material flow simulations, general planning, and project implementation. Leveraging proven best practices alongside innovative visualization and simulation tools, they not only enhance planning accuracy and identify optimization opportunities but also foster a shared understanding of processes throughout the collaborative consulting journey.

Logistics Consulting – Neutral and Independent

With over 60 years of extensive consulting experience and more than 6,500 successfully completed projects, EPG Consulting will showcase sustainable and future-ready supply chain solutions at LogiMAT 2025, from initial concept to implementation. In addition to this year's focus topics, industry professionals visiting Hall 1, Booth 1F58, will gain exclusive insights into EPG Consulting's comprehensive consulting portfolio.
