EPG – THE OUTSOURCING EXPERTS

EPG is your IT expert for outsourcing and private cloud hosting. We support you in operating the EPG | LFS warehouse management system and the corresponding IT infrastructure and take care of the required logistics IT. Customers from all over the world rely on our private hosting solution.

Profit from the numerous benefits of this IT service on highly scalable IBM systems. We offer different platforms like Windows, Linux or IBM i and use the high-availability IT infrastructure of the TelemaxX computer fortress.

TELEMAXX – THE COMPUTER FORTRESS

In Karlsruhe, the TelemaxX Telekommunikation GmbH operates five high-security computer centers that are connected via a fiberglass ring. 250 customers already count on the security of these IT fortresses. Individual space and high-quality server housing in top quality – TelemaxX stands for IT systems with maximum security. Nine public utility companies from the Karlsruhe region are shareholders of the company. Every three years, the certification agency TÜV-Saarland certifies the computer centers in accordance with the strict ISO norm 27001.

FACTSHEET

EPG® | Ehrhardt Partner Group

Smarter Connected Logistics™

HIGHSPEED OUTSOURCING

Profit from our secure connections with the TelemaxX computer centers. The advantage of hosting is that complex installations and updates, expensive hardware and time-consuming maintenance belong to the past. We directly connect you with the servers in Karlsruhe. All that happens at high speed: The connection speed in Germany is below 100 milliseconds

EPG | CLOUD – the EPG private cloud solution

With the EPG Private Cloud we have developed a concept that grows with your needs. You decide which functions of the EPG | CLOUD you would like to use. We will adapt our solution to your individual requirements. You always obtain a customized infrastructure with a backup solution. This combines the highest possible IT security with maximum flexibility and scalability.

Maximum security and high availability

IT outsourcing only works when security, discretion and permanent data availability are guaranteed. We fulfil these requirements. Convince yourself: The computer centers in Karlsruhe are highly redundant. All the important systems exist multiple times. We host your data in Germany under German law so that you always know where your sensitive information is stored.

"Thanks to EPG | CLOUD, we are extremely flexible concerning our staff deployment, because we do not need extra staff for the server operation. This way, we can focus on our core business and quickly react to changing conditions."

Jens Vinson, Manager 3PL JAS Forwarding, Neu-Isenburg

THIS IS HOW **EPG** PROTECTS YOUR DATA

+ **Data mirroring** at different locations
+ **Disturbance report systems**
+ **Highly redundant power supply**
+ **24/7 support** up to the operating level and for all connections between EPG and its customers
+ **Emergency diesel generators** for up to four days of autonomous power supply
+ The computer centers are divided into **fire compartments with early fire detection**
+ **Modern extinguishing system**
+ An **access control system** makes sure that only authorized personnel can access the computer centers
+ **Physical protection** thanks to safety fences, barbed wire and lightning conductors
+ Permanent **video surveillance**
