LYDIA VOICE USERS GLOBALLY

Ergonomics and Worker Safety at 100%

LYDIA Voice offers an intuitive hands- and eyes-free solution, enabling employees to concentrate on tasks. The ergonomic and intuitive working approach contributes to consistently high LYDIA Voice acceptance levels, fostering positive worker retention. Our unique LYDIA VoiceWear provides workers with the option of a headset-free work experience, enhancing flexibility and user experience.

+ 20 % Productivity

Voice interaction occurs in parallel with the actual work steps, resulting in accelerated and more efficient processes. LYDIA Voice improves worker productivity by up to 20% or more, surpassing paper-based picking approaches by more than 35%, and outperforming other voice solutions by up to 15%, due to AI-powered speech recognition.

99.9% Accuracy with Zero Training

Streamline onboarding with an over 80% reduction in training time, LYDIA Voice eliminates the need for voice training, guiding and supporting employees in their picking tasks. This comprehensive approach also contributes to a remarkable 50% reduction in picking errors.

Superior Flexibility

LYDIA Voice integrates seamlessly with all ERP and WMS systems within days, not months. In addition to a fast integration, voice solutions allow unparalleled flexibility and scalability. As requirements change, the voice dialogue can be easily adjusted.

HEARING THIS FROM YOUR CUSTOMERS? WE SHOULD TALK!

"We have a difficult labor market, so more productivity is important, but we need to enable productivity, not force it."

"We think license flexibility is crucial. Having options like Subscription and SaaS, along with innovative models like Device as a Service (DaaS), ensures we can tailor our approach to meet our evolving needs and optimize our technology investments."

"We are growing fast thanks to a good product and a vertical business model, it's important to our success."

"We see the imperative for standardizing our devices on the Android platform for improved efficiency. Having a centralized solution, whether through MDM or SOTI, would greatly streamline the management of our hardware, offering the flexibility we need."
