EPG ONE™

Supply Chain Execution Suite

” EPG offers a sophisticated, proven WMS with extensive functionality and depth, which can also be scaled for highly complex warehouse environments – including Gartner® highly automated warehouses (Level 4 and 5).“

EPG ONE™ Supply Chain Control Tower

TIMESQUARE serves as a central Supply Chain Control Tower, offering a comprehensive dashboard for monitoring and managing your logistics processes—including WMS, WCS, TMS, and more. With standardized or customizable dashboards, you gain real-time insights into processes and KPIs, enabling analysis and optimization across the entire supply chain.

EPG ONE™ Contract and Billing

The **Contract and Billing (CnB)** system digitizes contract processes and automates billing across the supply chain. It ensures complete service tracking and accurate, contract-compliant pricing. With digital contract management and automated invoicing, CnB boosts revenue by 3–5% and shortens the time-to-cash cycle—enhancing efficiency and cash flow.

EPG ONE™ Workforce Management System

The **Workforce Management System (WFM)** streamlines personnel planning—from warehousing to road, rail, sea, and air transport. Combining HR and logistics functions, it enables demand-driven deployment, shift planning, and real-time control with capacity balancing. A mobile communication platform supports information exchange and boosts flexibility and efficiency.

LYDIA Voice

LYDIA Voice is the leading voice-directed picking solution for logistics, manufacturing, and retail. Its speaker-independent recognition allows immediate use—ideal for rotating teams. The “hands-free, eyes-free” model supports ergonomic, safe, and efficient work. Multilingual and rugged, it suits tough environments. Businesses gain productivity, fewer errors, and strong user acceptance.

EPG ONE™ International Shipping System

The **ISS multi-carrier shipping software** supports label generation for over 250 parcel carriers with more than 2,500 service codes. Its multi-client capability allows for flexible handling of various shipping orders. Automated rate shopping reduces shipping costs, while comprehensive tracking and tracing ensure maximum transparency, improving shipping efficiency by up to 35%—for faster deliveries and optimized logistics costs.

EPG ONE™ GREENPLAN Route Planning and Execution

GREENPLAN sets new standards in route optimization, delivering an 8–20% performance improvement over global competitors in both efficiency and punctuality. As the winner of the Amazon Last Mile Challenge, GREENPLAN outperformed the second-place contender (MIT) by an impressive 42%. With its globally unique capabilities, GREENPLAN is ranked the No. 1 route planning solution in the Gartner VRS Market Guide, helping businesses optimize transportation processes efficiently and sustainably.

EPG ONE™ Warehouse Management System

The industry-independent **Warehouse Management System (WMS)** is one of the top three WMS platforms worldwide. With over 35 years of experience in the warehousing and logistics industry, it enhances performance and accuracy in manual, semi-automated, and fully automated warehouses. With more than 1,800 implementations worldwide, our WMS is a proven system for logistics.

EPG ONE™ Warehouse Control System

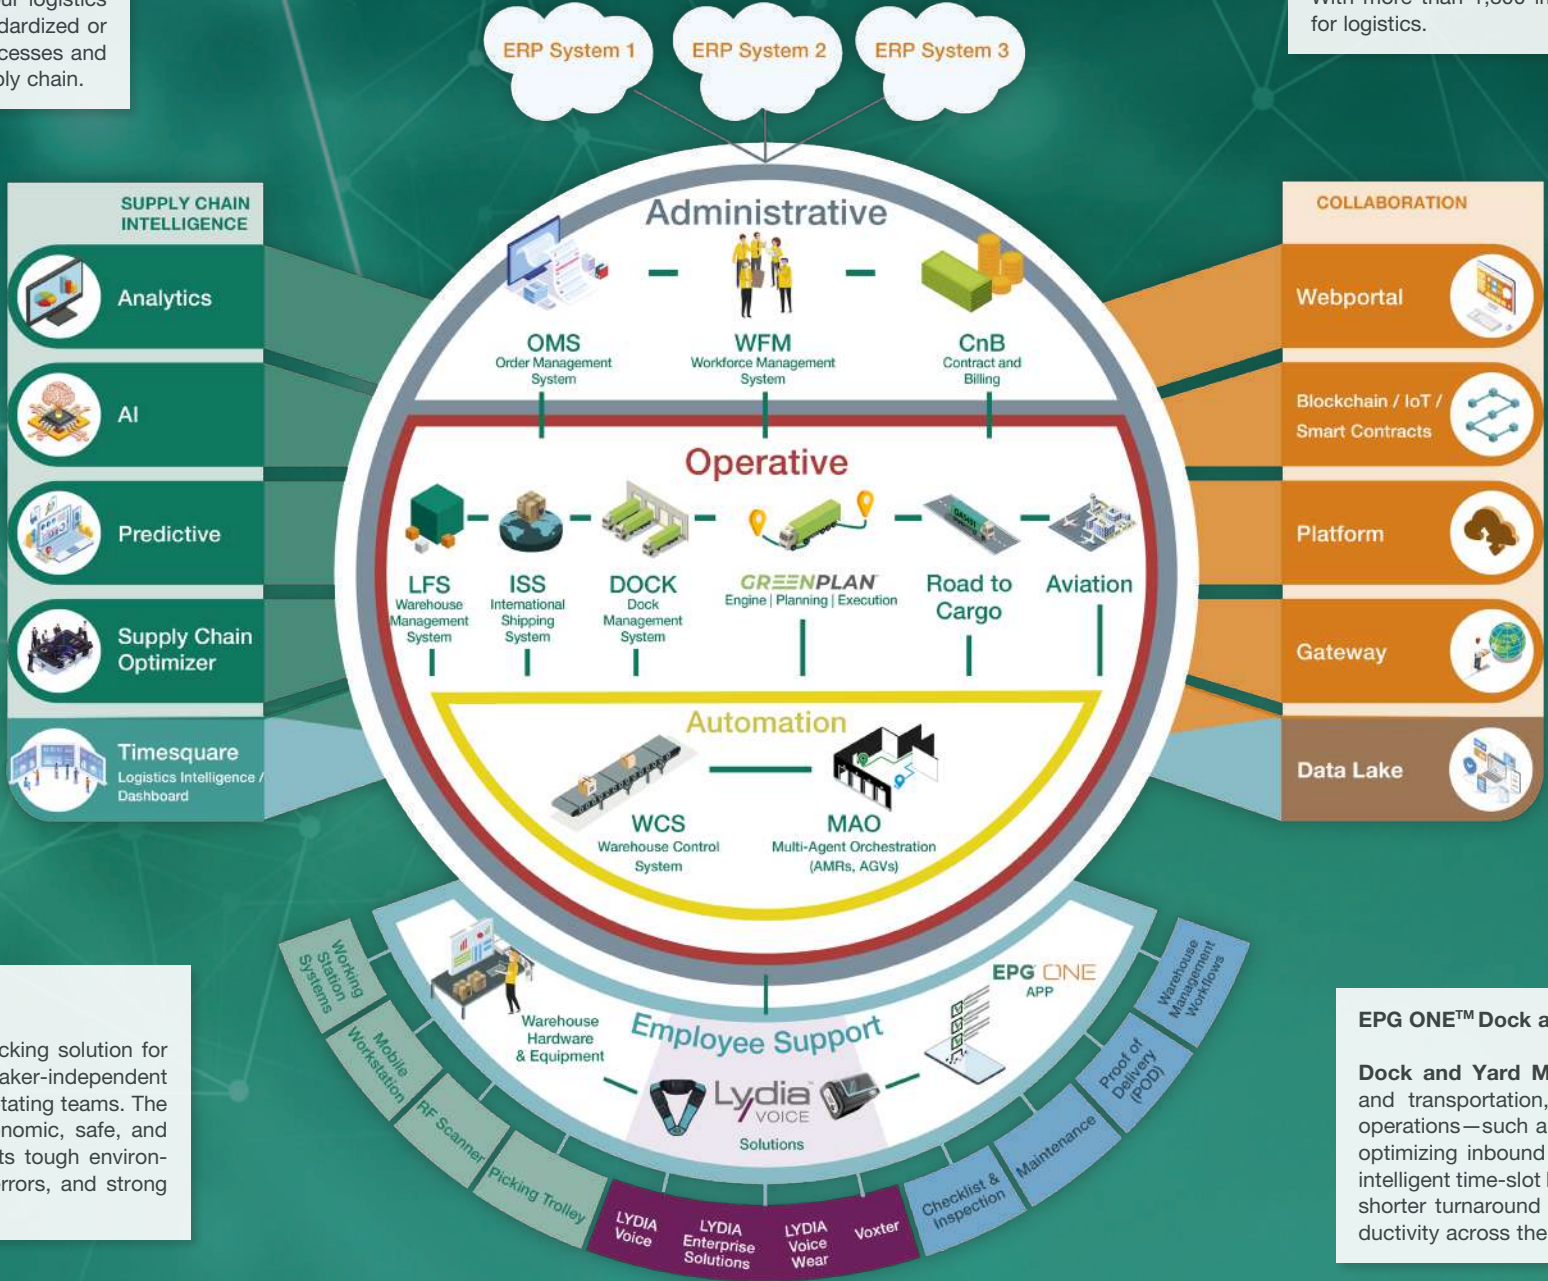

According to market research firm Gartner, EPG is a global leader in automating complex warehouse environments. The **Warehouse Control System (WCS)** offers maximum control over automated material flows, integrating various systems and standardizing MHE controls—such as AGVs or AMRs. Its scalability makes it ideal for greenfield, brownfield, and retrofit projects. The material flow controller seamlessly integrates into existing infrastructures and provides manufacturer- and hardware-independent connectivity for automated warehouse systems.

EPG ONE™ App

The **EPG ONE™ App** fully digitizes workflows and process documentation as a mobile workflow task system. This cloud-based app allows companies to manage checklists and inspection processes—such as quality controls, value-added services, or proof of delivery (PoD)—without IT expertise or external resources. Employees receive real-time task updates directly on their devices and can also work offline. With its intuitive interface, real-time documentation, and live status tracking, this SOC-2 and ISO-27001 certified solution ensures flexible and efficient workflow management.

EPG ONE™ Dock and Yard Management

Dock and Yard Management (DOCK) seamlessly connects warehousing and transportation, increasing transparency and efficiency in warehouse operations—such as dock assignment and order control—by up to 20%. By optimizing inbound and outbound planning, it minimizes downtime through intelligent time-slot booking and precise loading/unloading control. The result: shorter turnaround times, improved resource utilization, and increased productivity across the supply chain.

EPG AT A GLANCE: POWERING LOGISTICS EXCELLENCE

Ehrhardt Partner Group (EPG) is a global leader of unified supply chain execution technology, supporting global brands for over 35 years with smarter connected logistics. Over 1,600 organizations around the world put their trust in EPG and its suite of solutions to optimize complex logistics processes from manual to fully automated warehouse environments. EPG ONE™ unified supply chain software centralizes WMS, WCS, WFM, voice solutions, multi-car-

rier global shipping execution, intelligent route optimization, dock management, contract and billing management, and supply chain control tower, enabling integrated supply chain and logistics management from end-to-end. EPG empowers customers with value-added support—delivering expert logistics consulting, flexible cloud solutions, reliable managed services, and practical, results-driven training through its own logistics academy.
